PROFESSIONAL GENETICS

**3RD WOODVIEW
WAGYU PRODUCTION SALE**

11:00 | SATURDAY 14 APRIL 2018

WOODVIEW.CO.ZA • WOODVIEW@MWEB.CO.ZA

WELCOME

On behalf of everyone at Woodview I would like to welcome you to our 3rd Wagyu production Sale. We are seeing a lot of interest in the Wagyu breed all over the world and the demand for genetics and Wagyu beef is at a premium. The proof of the pudding is in the eating as they say, once you

have tasted a piece of highly marbled Wagyu beef you want more. This demand for the beef is driving the Wagyu seed stock market worldwide.

We are fortunate that we started breeding with Wagyu 20 years ago and have acquired knowledge about what the different bloodlines have to offer. To become a top breeder one needs information and this you can only get from the society, fellow breeders and close friends. We have been fortunate to travel to Australia and the USA regularly and have made amazing friends who have helped us immensely.

The cattle on offer are from the heart of the Woodview herd and are an example of the bloodlines that we breed from. Many of these cows have been flushed and some of them are extremely valuable when you consider their bloodlines and the number of embryos they donate.

For the first time in South Africa we will be supplying information on the hereditary conditions of the sale cattle. We will be supplying the results for the following tests; CHS, CL16 and F11. We will also include the results for the growth hormone GH Exon5 and for the fat softness gene SCD. I have based my breeding decisions on this information. There will be a full explanation on how to use this information on pages 4 and 5 of the catalogue.

I have been using the services of Unistel laboratories for DNA since 2008 with excellent results. Dr Marx and his team go out of their way to supply timeous and accurate service, my thanks to them.

This auction will be a live online auction with live streaming of the auctioneer on every lot. This is a first for the cattle industry. Once you have registered and logged in, you can watch the auction live and bid from your cell phone or laptop from anywhere in the world. For more information on how to register please look at www.woodview.co.za.

Please enjoy the day at Woodview!

Brian Angus

WELKOM

Namens almal by Woodview wil ek u graag verwelkom by ons 3de Wagyu produksieveiling. Ons sien baie belangstelling in die Wagyu-ras oor die hele wêreld en die aanvraag na genetika en Wagyu-beesvleis is op 'n premie. "Die bewys van die pudding is in die eet" soos hulle sê, sodra jy 'n

stukkie hoogs gemarmerde Wagyu-beesvleis geproe het, wil jy meer hê. Die aanvraag vir die beesvleis stimuleer die mark vir Wagyu genetika wêreldwyd.

Ons is gelukkig dat ons 20 jaar gelede met Wagyu's begin teel het en kennis opgedoen het oor wat die verskillende bloedlyne aanbied. Om 'n top teler te word, benodig jy inligting, en dit kan jy net van die genoodskap, mede-telers en goeie vriende kry. Ons is gelukkig om gereeld na Australië en die VSA te reis en het wonderlike vriende gemaak wat ons geweldig gehelp het.

Die beste wat aangebied word, is van die hart van die Woodview-kudde en is 'n voorbeeld van die bloedlyne wat ons aanbied. Baie van hierdie koeie is gespoel en sommige van hulle is uiters waardevol as jy hul bloedlyn en die aantal embryo's wat hulle skenk, oorweeg.

Vir die eerste keer in Suid-Afrika sal ons inligting verskaf oor die genetiese toestande van die diere op die veiling. Ons sal die resultate vir die volgende toetse lewer; CHS, CL16 en F11. Ons sal ook die resultate vir die groeihormoon GH Exon5 en ook die resultate vir die vet sagtheid gene SCD insluit. Ek het my teelbesluite is al vir jare op hierdie inligting gegrond. Daar sal 'n volledige verduideliking wees hoe om hierdie inligting te gebruik op bladsye 4 en 5 van die katagolus.

Ek gebruik die dienste van Unistel laboratoriums vir DNA sedert 2008 met uitstekende resultate. Dr Marx en sy span gaan uit hul pad om tydige en akkurate diens te lewer, my dank aan hulle vir al hulle werk om hierdie inligting betyds vir die veiling te kry.

Hierdie veiling sal 'n lewendige aanlyn-veiling wees met "live streaming" van elke lot. Dit is 'n eerste vir die veebedryf. Sodra jy geregistreer en ingeteken het, kan jy die veiling sien en van jou selfoon of skootrekenaar oral van die wêreld af bie. Meer besonderhede hieroor by www.woodview.co.za

Geniet die dag by Woodview!

Brian Angus

PUREBRED VS FULLBLOOD WAGYU

WHAT ARE THE DIFFERENCES BETWEEN FULLBLOOD, PUREBRED AND F1, F2, F3 WAGYU IN TERMS OF THE LIVESTOCK?

SOUTH AFRICAN FULLBLOOD WAGYU ARE 100% DIRECT DESCENDANTS OF JAPANESE HERDBOOK LIVESTOCK, AND THESE ANIMALS ARE DIRECTLY COMPARABLE TO THOSE IN TODAY'S JAPANESE HOME HERD.

DNA parent verification has confirmed this direct lineage for all animals registered in the South African Wagyu Association Herdbook. Purebred, F3, F2 and F1 are crossbred Wagyu defined under the Wagyu Breed Trade Descriptions as:

The offspring of a Wagyu full blood sire and a Wagyu full blood dam whose forebears originate from Japan and whose pedigree shows no evidence of any crossbreeding

Has 50% of higher Wagyu genetic content. For example the first generation of crossbreeding a Wagyu fullblood or purebred sire and the dam of a another breed

LEVEL OF WAGYU MANAGEMENT

WAGYU FULLBLOOD

100%

CROSSBRED WAGYU F1

50%

PUREBRED WAGYU F4

93+%

CROSSBRED WAGYU F2

75%

Has greater than 93% Wagyu genetic content. For example, the result of at least four generations of crossbreeding using a Wagyu fullblood or purebred sire and a crossbred Wagyu F3 dam

Has 75% of higher Wagyu genetic content. For example is the result of at least two generations of crossbreeding, using a Wagyu fullblood or purebred sire and a crossbred Wagyu F1 dam

CROSSBRED WAGYU F3

87+%

Has greater than 87% Wagyu genetic content. For example is the result of at least three generations of crossbreeding, using a Wagyu fullblood or purebred sire and a crossbred Wagyu F2 dam

HEREDITARY CONDITIONS IN WAGYU OUTSIDE JAPAN

WAGYU HAVE BEEN IDENTIFIED WHICH ARE AFFECTED BY, OR ARE CARRIERS OF, THE FOLLOWING KNOWN CONDITIONS

CHS (CHEDIAK HIGASHI SYNDROME)

The bleeding disorder in cattle with a light coat colour is caused by an autosomal recessive mutation which is caused by the substitution of a nucleotide on the LYST gene. There is also depressed immunity. Carriers that have been identified from the initial testing of foundation animals are Itomoritaka 002 (J2703, FB681 and IMJFAJ2703), Itoshigefuji TF147 (FB3681 and IMUFQTF147), Mazda (FB103 and IMUFA0103), Mitsuhikokura TF149 (FB3683 and IMUFNTF149), TF601 (FB5999 and IMUFZ5999) and TF603 (FB6188 and IMUFZ6188).

CL16 (CLAUDIN 16 DEFICIENCY TYPE 1)

This condition in Black Wagyu is also called Renal Tubular Dysplasia and is a lethal autosomal recessive condition. Kidney failure and retarded growth are caused and can be associated with overgrown hooves and diarrhoea. Type-1 mutation is caused by a 37kb deletion and the more recent Type-2 mutation is caused by a 56-kb deletion. The frequency of the CL16 deficiency mutant gene in Japan is 0.1. Foundation animals Yasufuku Jr (FB5061 and PEDFS100), JVP Yasutanisakura 931 (FB2102 and IMUFN2102) and Kimifuku TF726 (FB7584 and IMUFB7584) are known to be carriers of CL16.

F11 (FACTOR XI DEFICIENCY)

Factor XI deficiency is encountered in Wagyu and Holstein. There are similarities in the clinical symptoms in the breeds. The causative insertion mutations are on different locations of the F11 gene and these variations are considered to be responsible for the differences in severity between the breeds. Factor XI deficiency in Wagyu has an autosomal recessive mode of inheritance. Reports suggest effects on reproductive performance with a 50% greater incidence of repeat breeding of affected animals.

THE GH EXON 5 AND SCD GENE IN WAGYU CATTLE

GROWTH HORMONE EXON 5 (GH EXON 5)

This test represents a method for evaluating Japanese Black cattle for the important economic characteristics of growth rate and the deposition of fat in certain tissue (marbling) using genetic polymorphism of the growth hormone Exon 5. Growth hormone is one of the peptide hormones and has an impact on the growth of cattle by controlling energy flow in the body. GH has been shown to have an impact on fat accumulation in certain tissue of Japanese Black cattle.

The GH gene consists of a DNA strand that has 5 segments (the segment unit is called exon) which translate into amino acids. Two mutations were found in the 5th exon of the GH gene of Japanese Black cattle. These mutations have not been found in any other breed. These variants are called A, B and C. There are 6 genotypes AA, AB, AC, BB, BC & CC. (Allele A is a Western type and was introduced into the Wagyu genome from western countries.

Allele B is of unknown origin and has been present in the Wagyu genome for millennia. Allele C is the Wagyu original). The preferred genotypes for producing bulls for F1 production are BB, BC and CC. Breeding of 100% Wagyu these are still the preferred bull genotype but AC cows can provide the base female genotype at this time.

STEAROYL CA DESATURASE (SCD)

SCD is the enzyme which changes stearic acid into oleic acid. The fat of cattle is composed of 6 main fatty acids. Within these fatty acids one of the saturated fatty acids is stearic acid. Stearic acid makes deposited fat harder and increases the melting point. Conversely oleic acid makes the fat soft with a low melting point. There is an opinion in the Japanese market that the percentage of beef that is "not delicious"

has increased recently even though marbling has been abundant. Fat of a high melting point is not as palatable to the consumer as the low melting point fats that have been traditionally associated with Wagyu beef.

Let us imagine we are cooking a piece of beef loin that has a high melting point fat composition in a frying pan. The fat will melt during the cooking process however when we put it in our mouth and it cools to near our body temperature it will become solid. We may feel we are eating butter containing grains of sand and it certainly will not be delicious. I believe that the common incidence of such higher melting point fat in these days has come from a biased view of marbling.

The Japanese market, have placed too much emphasis on visible marbling and disregarded the type of fat represented. Fat containing high levels of stearic acid is like wax in appearance when the carcass is in the cool room and so it is easier to assess than the soft fats. Consumers all over the world are becoming more selective and prefer foods that are good for their health. Japanese Black cattle that have a genotype for a soft fat profile are better tasting and healthier when eaten than cattle that have high melting point fat.

There are several different DNA sequences of the SCD gene in Japanese Black cattle. These are categorized into 2 groups, A & V. Some Japanese Black cattle carry a special mutation that changes the corresponding amino acid from Valine (V) to Alanine (A) which has a significant relationship to the melting point of fat. Alanine type has a lower melting point than valine type. Therefore the preferred type is AA.

By using the SCD gene we can select the cattle which can deposit a soft and oleic acid rich fat that is delicious and healthy. At this time no gene tests should be used as the single selection criteria that a cattle farmer would use. Rather they should be seen as part of the selection process when choosing cattle for breeding.

Cattle that show preferred genotypes for both GH Exon 5 and SCD provide the most likely animals to improve a cattle herds performance, but only, if all other factors are satisfactory

DESCRIPTION

Woodview Tajima is an imported embryo cow that has produced exceptionally well for us. Because we wanted to get more of her genetics quickly we flushed her in November 2016, and retrieved 29 good embryos. We flushed her another 6 times in 2017 and she is averaging 19 embryos per flush. We have decided to sell her as we already have 15 of her calves at Woodview. She sells with an embryo heifer calf out of ITOSHIGENAMI TF 148 with the recipient Angus cow. This is a top offering as the heifer should also flush well and the buyer gets a proven recipient Angus cow. Ran with HJ13-05 & BA09-330

BESKRYWING

Woodview Tajima is 'n ingevoerde embryo koei wat uiters goed vir ons gedoen het. Omdat ons gou meer van haar genetica wou kry, het ons haar in November 2016 gespoel en 29 goeie embryos is gekolekteer. Ons het haar in 2017 nog 6 keer gespoel ons het gemiddeld 19 embryos per spoel gekry. Ons het besluit om haar te verkoop, aangesien ons reeds 15 van haar kalwers by Woodview het. Sy verkoop met 'n embryo-kalf van ITOSHIGENAMI TF 148 met die ontvanger Angus-koei. Die is n top- aanbod aangesien die vers ook goed behoort te spoel en die koper kry hier ook n top ontvanger Angus-koei. Sy loop saam met bulle HJ13-05 & BA09-330

DESCRIPTION

Woodview ITOSHIGENAMI carries some of the best genetics ever produced at Woodview. She is sired by ITOSHIGENAMI TF148 and also carries MICHIFUKU & TF ITOMICHI 1/2 in her pedigree. She is an amazing donor cow averaging 10 embryos per flush. She sells with a beautiful heifer calf BA17-231 by the bull HIRASHIGETAYASU (001) which is the perfect combinations. A highly bred TAJIMA cow. The recipient Angus cow is also included in the offering. Ran with HJ13-05 & BA09-330

BESKRYWING

Woodview ITOSHIGENAMI dra enkele van die beste genetica wat ooit by Woodview geteel is. Sy is gevader deur ITOSHIGENAMI TF148 en dra ook die gene van MICHIFUKU & TF ITOMICHI 1/2 in haar stamboom. Sy is 'n wonderlike skenkerkoei wat gemiddeld 10 embryo's per spoel gee. Sy verkoop met 'n pragtige vers kalf BA17-231 van die bul HIRASHIGETAYASU (001) wat die perfekte kombinasies is. 'n Uiters goed geteelde TAJIMA-koei. Die ontvanger Angus-koei is ook by die aanbod ingesluit. Sy loop saam met die bulle HJ13-05 & BA09-330

DESCRIPTION

She is an example of how fertile Wagyu cattle are. She calved at 15 months of age and has had a calf every year since. It was not easy to put her on the sale. She is an excellent breeding cow. I flushed her in December 2017 and she gave me 19 embryos. A very special cow. DO NOT MISS HER!!! She ran with BA15-372 & BA09-327

BESKRYWING

Sy is 'n voorbeeld van hoe vrugbare Wagyu-beeste is. Sy het gekalf op 15 maande en het elke jaar 'n kalf. Dit was nie maklik om haar op die veling te plaas nie. Sy is 'n uitstekende teel-koei. Ek het haar in Desember 2017 gespoel en sy het vir my 19 embrio's gegee. 'n Baie spesiale koei. MOET HAAR NIE MIS-LOOP NIE!!!! Sy loop saam met die bulle BA15-372 & BA09-327

DESCRIPTION

It was a tough decision to consign one of our best heifers...but necessary to set the precedence of quality we will offer to other Akaushi breeders annually. This heifer is broody and tough built, stout yet correct in her design and backed by generations of proven females. If you like stud females that are bold bodied, good footed and easy to be around...here she is! ZEWB170043's dam is sired by one of Australia's best cow and carcass producer, Kajikari B0125. On her maternal said you'll find the matrons Almiko V2277, Namiko, Akiko and Ume. She sells open

BESKRYWING

Dit was 'n moeilike besluit om een van ons beste verse te stuur...maar nodig om die voorrang van gehalte te stel wat ons jaarliks aan ander Akaushi-telers sal bied. Hierdie vers is broeiend en taai gebou, stewig, maar korrek in haar ontwerp en ondersteun deur geslagte van beproefde vroulike diere. As jy hou van stoetkoeie wat vet, stewig is, goed gehoef is en maklik om rond te wees...hier is sy! ZEWB170043 se ma word deur een van Australië se beste kudde- en karkasprodusent, Kajikari B0125, aangehoor. In haar ma se stamboom vind ons Almiko V2277, Namiko, Akiko en Ume. Sy is oop.

┌ WOODVIEW MEGAN

DESCRIPTION

An amazing young cow. She calved at 21 months and reared a bull calf BA15-458 out of the imported sire TAKEFUKU 823. She has calved every year since and her bull calf BA15-458 already has 5 registered calves in the Woodview herd. Unbelievable fertility. If this is not enough she is very well bred, being sired by ITOSHIGENAMI TF148 out of a HIRASHIGETAYSU (001) x KITARTERUYASU D01 (003) cow. I flushed her once and she gave me 10 embryos. This is a world class cow!!!
Ran with BA13-988, HJ13-16 & HJ14-16

BESKRYWING

'n Wonderlike jong koei. Sy het op 21 maande haar eerste kalf BA15-458 n bul-kalf gehad, uit die ingevoerde bul TAKEFUKU 823. Sy het elke jaar gekalf en haar bul kalf BA15-458 het reeds 5 geregistreerde kalwers in die Woodview-kudde. Ongelooflike vrugbaarheid. Asof dit nie genoeg is nie, is sy ook baie goed geteel, haar pa is ITOSHIGENAMI TF148 en sy is uit 'n HIRASHIGETAYSU (001) x KITARTERUYASU D01 (003) koei. Ek het haar een keer gespoel en sy het my 10 embryos gegee. Dit is 'n wêreldklas koei!!!
Sy loop saam met bulle BA 13-988, HJ 13-16 & HJ14-16

DESCRIPTION

She is sired by the milk and growth bull ITOSHIGEFUJI 147, who has been used extensively in Australia. Her dam sells as lot 6 on this sale and is probably the best cow we have ever bred. Her genetics will be used in Wagyu herds all over South Africa. She combines 3 of the top bulls ever to leave Japan, ITOSHIGENAMI TF148, MICHIFUKU and TF ITOMICHI 1/2. I flushed 12-749 in December 2016 and she gave 10 embryos. Ran with BA13-923, HJ13-04 & HJ14-16

BESKRYWING

Sy is die dogter van ITOSHIGEFUJI 147 wat gebruik word vir melk- en groei, hy word ook wyd in Australië gebruik. Haar ma verkoop as lot 6 op hierdie veiling en is waarskynlik die beste koei wat ons ooit geteel het. Haar genetica sal in Wagyu-kuddes regoor Suid-Afrika gebruik word. Sy kombineer 3 van die top bulle wat ooit Japan verlaat het. Naamlik ITOSHIGENAMI TF148, MICHIFUKU en TF ITOMICHI 1/2. Ek het BA12-749 in Desember 2016 gespoel en sy het 10 embryo's gegee. Sy loop ook saam met bulle BA13-923, HJ13-04 & HJ14-16

DESCRIPTION

This young cow combines the bloodlines of HIRASHIGETAYASU (001) and MICHIFUKU which is a proven combination. She calved at 23 months and has an intercalving period of 364 days showing her fertility. She produces great calves and will be an asset in any herd.

Ran with BA15-372 , BA09-327 & HJ14-16

BESKRYWING

Hierdie jong koei kombineer die bloedlyne van HIRASHIGETAYASU (001) en MICHIFUKU, wat 'n bewese kombinasie is. Sy het op 23 maande gekalf en het 'n inter- kalftydperk van 364 dae wat haar vrugbaarheid toon. Sy produseer groot kalwers en sal 'n aanwinst in enige kudde wees. Sy loop saam met bulle BA15-372 & BA09-327

 She ran with bulls HJ15-001 and BA09-337

BESKRYWING

'n Baie nuttige jong vers. Sy het 'n uitstekende stamboom en behoort goeie gebalanseerde beeste te teel. Met HIRASHIGETAYASU (001), ITOSHIGENAMI TF 148, twee keer en ons baie produktiewe MEGAN-lyn wat na KITATERUYASU DOI (003) en TAKAZAKURA terugkeer. Haar ma verkoop as lot 3 op die veiling. Sy was die beste vers in haar groep in 2015. Sy loop saam bulle HJ15-001 en BA09-337

DESCRIPTION

I picked out this young heifer for the sale because other sire Quest 001 he is a well balance bull that I have had 87 calves from him. And he is running with 40 cows again. The same with her dam Campanella, she is an awesome MICHIFUKU cow with great breeding. She has done really well for me. She ran with bulls BA16-933 and HJ15-003

BESKRYWING

Hierdie jong koei het ek vir die veiling uitgesoek omdat haar vaar Quest 001 'n goeie gebalanseerde bul is waarvan ek al 87 kalwers het en hy loop weer met 40 koeie. Dieselfde met haar ma Campanella, sy is 'n wonderlike MICHIFUKU-koei met groot teeling. Sy het baie goed vir my gedoen. Sy loop saam bulle BA16-933 en HJ15-003

DESCRIPTION

This is a special cow that is really well bred. She has ITOSHIGEFUJI TF 147 and the TAJIMA bulls KITATERUYASUDOI (003) twice and also MICHIFUKU in her pedigree. It was difficult to put her on the sale, as she was only 22 months old when she calved. She has given me 4 calves with an inter calving period of 366 days.
She ran with BA09-335 & HJ13-16

BESKRYWING

Sy is 'n spesiale koei wat baie goed geteel is. Sy het ITOSHIGEFUJI TF 147 en die TAJIMA-bulle KITATERUYASUDOI (003) twee keer en ook MICHIFUKU in haar stamboom. Dit was moeilik om haar op die veiling te plaas, want sy was net 22 maande oud toe sy gekalf het. Sy het al vir my 4 kalwers gegee met 'n tussen -kalfperiode van 366 dae. Sy loop saam met BA09-335 & HJ13-16

DESCRIPTION

She sells with her Angus recipient mother. Her sire is the well known TF 771 (ITOZURU DOI TF 151). Her dam was from an imported embryo combining the size, growth and milk of ITOSHIGEFUJI TF 147 & the marbling if ITOSHIGENAMI TF148. Using this combination of bulls was recommended to me many years ago by David Blackmore

BESKRYWING

Sy verkoop saam met haar Angus ontvanger ma. Haar vaar is die bekende TF 771 (ITOZURU DOI TF 151). Haar ma is afkomstig van ingevoerde embryos wat die grootte, groei en melk van ITOSHIGEFUJI TF 147 kombineer en die marmering as ITOSHIGENAMI TF148. Die gebruik van hierdie kombinasie van bulle is baie jare gelede deur David Blackmore aanbeveel.

DESCRIPTION

This embryo heifer sells with her Angus recipient mother. Semen from her sire TF ITOMICHI ½ sold for R10 000.00 at an auction in Stellenbosch. She is the real deal as her sire is a big powerful bull with growth and her dam is sired by the marbling KING MICHIFUKU. Her dam BA09-321 is an awesome donor and she already has 21 progeny registered. This heifer should also flush well as her dam does.

BESKRYWING

Hierdie embryo-vers verkoop saam met haar Angus-ontvanger-ma. Semen van haar vaar TF ITOMICHI ½ is verkoop teen R10 000.00 op 'n veiling in Stellenbosch. Sy is die "WARE JAKOB", aangesien haar vaar 'n groot kragtige bul is met groei en haar ma word deur die marmering KING MICHIFUKU word gevaar. Haar ma BA09-321 is 'n wonderlike skenker en sy het reeds 21 nageslag geregistreer. Hierdie vers behoort ook goed te spoel net soos haar ma.

DESCRIPTION

These embryo heifers just get better. Her dam sells on the auction as Lot 5. Her sire REPUBLIC MUCHIFUKU has done extremely well at Woodview and has 65 calves to date. He combines two potent TAJIMA bulls MICHIFUKU and KITATEUYASU DOI (003) in his pedigree. This heifer should flush well as her mother flushes exceptionally well. She sells with her recipient Angus- mother.

BESKRYWING

Hierdie embryo-verse word net beter. Haar ma verkoop as Lot 5 op die veiling. Haar vaar REPUBLIEK MUCHIFUKU het by Woodview baie goed gedoen en het tot nou toe 65 kalwers. Hy kombineer twee kragtige TAJIMA-bulle MICHIFUKU en KITATEUYASU DOI (003) in sy stamboom. Hierdie vers behoort net soos haar ma goed te spoel. Sy verkoop saam met haar ANGUS -ontvanger ma.

DESCRIPTION

He is a very valuable embryo Bull probably the best I have produced to date. His outstanding dam WOODVIEW TAJIMA sells as Lot 5 on the auction. He is sired by ITOSHIGENAMI TF 148 who is regarded as the gold standard in the world when it comes to marbling, he is very well proven with 4352 progeny registered in Australia alone. He sells with his Angus recipient mother who should have many more embryo calves. This is probably the lot of the SALE.

BESKRYWING

Hy is 'n baie waardevolle embryo Bul, waarskynlik die beste wat ek tot dusver geteel het. Sy ma is die uitstaande koei WOODVIEW TAJIMA wat as Lot 5 op die veiling verkoop. Sy vaar is ITOSHIGENAMI TF 148, hy word beskou as die goue standaard in die wêreld wanneer dit kom by marmering. Hy is baie goed beproef in Australia met 4352 nakomelinge wat geregistreer is. Hy verkoop met sy Angus-ontvangermoeder wat baie meer embryo kalwers sal hê. Hierdie is waarskynlik die beste koopie van die VEILING.

DESCRIPTION

One of the first HENSHIN sons to be offered in ZA, and he is extra STOUT! The wide body and big testicles compliment his additional length and extension from the side. This bull exemplifies our goal to produce herd sires that are masculine powerfully constructed, good footed and durable for many seasons. You'll find additional Shigenami influence in his pedigree and you can see it in his extra dimension!

BESKRYWING

Een van die eerste HENSHIN seuns wat in ZA aangebied is, en hy is ekstra STEWIG! Die wye lyf en die groot testikels komplimenteer sy bykomende lengte en verlenging van die kant. Hierdie bul illustreer ons doel om kuddes te produseer wat manlik kragtig gebou is, goeie voet en duursame vir baie seisoene. Jy sal addisionele Shigenami-invloed in sy stamboom vind en jy kan sien of hy in sy ekstra dimensie is!

┌	HEART BRAND RED STAR
┌	KALANGA F C421
┌	HOMARE BLUE 38 (USA)

DESCRIPTION

This young herd bull is rich in Mitsutake KO 58's genetics who was a top 3 marbling sire in Japan during the 90's export to the US. His dam, Bald Ridge Kokoro, is influenced by Australian greats Kajikari, Almiko V2277 and HB Red Star. ZEWB170026 is a moderate framed, good bodied and wide bull from end to end. Here's a Red Emperor son that has power and marbling in one package!

BESKRYWING

Hierdie jong kuddebul is ryk aan Mitsutake KO 58 se genetica wat tydens die 90's na die VSA 'n top 3 marmerende vader was. Sy dam, Bald Ridge Kokoro, word beïnvloed deur die Australiese Greats Kajikari, Almiko V2277 en HB Red Star. ZEWB170026 is 'n gematigde geraamde, goeie lyf en breë bul van einde tot einde. Hier is 'n Rooi Keiser Seun wat krag en marmering in een pakket het!

DESCRIPTION

This is a very valuable TAJIMA bull bred for F1 production. He is sired by the famous bull ITOSHIGENAMI TF 148 who is probably the gold standard for marbling in the world. His dam BA09-331 combines the blood of two well proven bulls, BLACKMORE AIZATZURUDOI Y398 and ITOZURUDOI TF151. These are both high marbling sires PLUS they sire milk. With both bulls Y398 and TF151 being trait leaders for milk at +7. I am keeping a 10% share of future semen sales.

BESKRYWING

Hierdie is waardevolle TAJIMA bul geteel vir F1 produksie. Hy is gevaar deur die bekende bul ITOSHIGENAMI TF 148, wat waarskynlik die goue standaard vir marmering in die wêreld is. Sy m BA09-331 kombineer die bloed van twee goed beproefde bulle, BLACKMORE AIZATZURUDOI Y398 en ITOZURUDOI TF151. Die is albei hoë marmerende diere PLUS hulle teel melk. Met beide bulle Y398 en TF151 is eienskapeiers vir melk by +7. Ek behou 'n 10% -belang in toekomstige semenverkope.

DESCRIPTION

This is a big strong bull that I have used heavily in the stud. In his pedigree he combines size, milk, and marbling. More importantly he is free of any genetic defects. And he has the desirable genotypes BC for the EXON 5 growth hormone and also he has tested AA for the SCD genotype for fat softness. This all adds to his status as a top proven breeding bull.

BESKRYWING

Hierdie is n groot sterk bul wat ek sterk in die stoet gebruik het. In sy stamboom kombineer hy grootte, melk en marmering. Meer belangrik is hy vry van enige genetiese afwykings. En hy het die gewenste genotipes BC vir die EXON 5 groeihormoon en het ook AA getoets vir die SCD genotipe vir vet sagtheid. Dit alles dra by tot sy status as 'n top teelbul.

WAGYU CARCASSES

\$17,000 A WAGYU CARCASS IS SERIOUS BUSINESS IN JAPAN'S WHOLESALE MEAT MARKET

WATCHING INDIVIDUAL HIGH-QUALITY WAGYU CARCASSES SELL FOR THE EQUIVALENT OF \$17,000 AUSTRALIAN LEFT AN INDELIBLE IMPRESSION ON THE AUSTRALIAN WAGYU TRADE MISSION TOUR GROUP ON THE FIRST DAY OF THEIR 2017 STUDY TOUR TO JAPAN.

The visit to Tokyo's famous Metropolitan Central Wholesale Market was one of the first destinations on the two-week study tour itinerary.

The publicly-owned facility in the inner-city area of Shinagawa is the largest wholesale meat centre in Japan, accounting for more than 130,000 beef carcasses sold each year, plus 210,000 bodies of pork.

While some carcasses are transported in for sale from other locations, the centre also provides Japan's largest abattoir service, processing about 90,000 head of cattle each year.

What's surprising about that is that it happens efficiently and almost anonymously, in the middle of a heaving city of 32 million people. The facility, from the outside, bears no resemblance to a typical Australian abattoir facility, looking like any other large commercial-type building in the metropolis. The only cue to its purpose is a massive cold storage vehicle loading bay at one end, and a small livestock receival area.

The main auction sale room carries an overhead rail, on which the catalogue of each day's sale carcasses progresses. Each carcass is rolled forward, and a gallery of accredited buyers, representing 25 or 30 meat wholesale groups and large retailers, crowds around with torches to inspect each

body for marbling and other traits. Carcasses by this stage has been independently graded and branded for meat quality and yield, using a 22-point set of criteria. Yield is based on an A-C grade, and meat quality 1-5, with the ultimate 'A5' carcasses amounting to only 1-2pc of bodies sold each day.

Carcass weights were incredible, by Australian standards, with 500kg bodies common, and even 600kg bodies reasonably routine. Some bodies recently have broken the scales at more than 700kg.

Unlike open auction familiar in Australia, the method of sale was a silent auction, with each wholesaler representative using a small wireless device in his pocket to post bids on each individual carcass, displayed on a giant screen above the auction area. The very best carcasses could be up to ten times the value of base level carcasses, the group was told.

Carcasses from crossbred Wagyu cattle typically sold for around 1500 Yen per kg, while Fullblood carcasses sold in a typical range from 2000 to 3000 Yen per kg, depending on quality. One of the best carcasses to pass through the auction during the Australian visit made 2700 Yen/kg, valuing the 550kg carcass at 1.485 million Yen, or the equivalent of about \$17,000 Australian. The AWA tour group was told that the last day of the month, trading volume was down because most buyers had already hit their inventory targets for the month.

Today's catalogue involved about 400 bodies, while regular sales account for an average of 500, split roughly equally between Fullblood (purebred) Wagyu, and crossbreds. The cattle came from a large area of Japan, including the northern island region of Hokkaido.

Food safety and sanitation control were high priorities, the tour group was told. More than 16 years after Japan's isolated BSE event, every single carcass slaughtered is still tested for BSE, with all specified risk (nervous system) material removed and destroyed in high-temperature furnaces.

Nasionale Interrasvleisbeeskampioenskappe

@ ALFA

Die nasionale wennerse ontvang kontant- en produkpriese ter waarde van meer as

R50 000

HOE WERK DIT?

Die Hinterland Nasionale Vleisbees Interras Kampioenskappe word sedert 2016 tydens ALFA by die Afridome in Parys aangebied.

Manlike en vroulike diere wat die interraskampioenskappe van die twaalf grootste skoue in Suid-Afrika wen, word genooi om aan die kampioenskap deel te neem.

Die eienaars van die kampioene word genooi om vir die duur van ALFA, hul kampioene uit te stal en die ekspo as gaste van Hinterland by te woon. Verblyf word verskaf tesame met gratis kaartjies vir die dinee en toegangskartjies vir die ekspo.

Die 2017 Hinterland nasionale interraskampioenokoei is die rooi Angus-koei, Roechama Suré RMC 130018. Van links is Daan Bronkhorst en Phillip Lee van Hinterland, by die eienaars, Leslé, Gerhard, Suré en RC Malherbe, en die hanteerder, Ben Marumo.

Die 2017 Hinterland nasionale interraskampioenbul is die Braunvieh-bul, Witbek Salute HB 15-0011. Van links is Daan Bronkhorst en Phillip Lee van Hinterland by die eienaars, Hans en Marina Bester, en die hanteerder, Ishmael Nkosi.

Kwalifiseerder: 2018

Cois de Jager se Limousin-bul is as die interraswenner by die afgelope Ermelo-skoue. Die bul kwalifiseer vir die 2018 Hinterland Nasionale Interrasvleisbeeskampioenskappe by ALFA. Op die foto van links is Cois saam met die hanteerder, Petros Buthezi, Neil de Jager en Phillip Lee van Hinterland.

Diere wat by die volgende skoue kwalifiseer as interraskampioene, word na ALFA genooi:

Standerton (2017)	7 September 2017
Ermelo	1 – 3 Maart
Vryburg	26 – 28 Maart
Lichtenburg	16 – 20 April
Bloemfontein	26 April – 5 Mei
Royal	25 May – 3 Junie
Ellisras (Bosveldfees)	5 – 7 Julie
Thabazimbi	26 – 28 Julie
Tzaneen (Letaba)	8 – 11 Augustus
Warmbad	18 Augustus
George	29 Augustus – 1 September
Moorreesburg (Swartland)	5 – 8 September
Standerton	13 – 15 September

ALFA-PROGRAM

Beoordeling:

Donderdag 20 September om 14:00.

Prysuitdeling en parade:

Tydens ALFA-dinee, 20 September om 18:00.

WOODVIEW 3DE PRODUKSIE VEILING

BORGSKAP:

EMBRIO SPOELING

Embryo Plus borg 'n gratis spoeling as prys vir die koper wat die duurste vroulike dier koop op die 14 April 2018 veiling.

Dit sluit in:

- ✧ Folltropin en ander middels vir die skenker se sinkronisering
- ✧ Die spoel, oorplaas en bevriesing op die dag van spoeling van die embrio's sal op 'n bestaande roete gedoen word.

(Die prys sluit nie in die sinkronisasie van die ontvangers en ook nie enige opvolg besoeke om sulke gevriesde embrio's oor te plaas nie. Ook nie ingesluit, is die reiskoste)

Dear Woodview Bidder,

Hereby, the Partners of Absolute Genetics, offer the following sponsorship to the Woodview Auction clients on the 14th April 2018.

The sponsorship includes:

1. **ONE COMPLEMENTARY SEMEN COLLECTION** for the Woodview Bull that goes for the highest bid.
2. **ONE COMPLEMENTARY EMBRIO FLUSHING** for the Woodview Cow that goes for the 2nd highest bid.

Terms of the sponsorship:

The sponsorship includes only the cost of the service provided. The costs still due by the bidder would be: Housing, Synchronisation, Freezing and Storage, Travel expenses, Follow-up visits or any alternative expenses to the service that Absolute Genetic provides.

We look forward to working with you.

Kind Regards,

Dr. Collin Albertyn

THE HISTORY OF KOBE BEEF IN JAPAN

BY JOHN W. LONGWORTH

From Beef in Japan by Prof. John W. Longworth, University of Queensland Press, 1983. This book is currently out-of-print, and this information is used here with the kind permission of Prof. Longworth.

EATING MEAT FROM FOUR LEGGED ANIMALS WAS PROHIBITED IN JAPAN FOR MORE THAN A THOUSAND YEARS PRIOR TO 1868.

This ban was especially strict during the Edo Period (1603-1867). Buddhist influences were primarily responsible for this dietary restriction, but other cultural factors and the need to protect draught animals in times of famine may have reinforced the taboo. After the Meiji Restoration in 1868, the new leaders of Japan wanted, among other things, to reduce traditional social barriers and to encourage the adoption of beneficial Western habits. There may also have been a desire to weaken the power of the Buddhists. Lifting the ban on the eating of meat was a small step towards these objectives. Nevertheless, it must have astounded the nobility of the day to see the young Emperor Meiji eating beef.

Despite the formal rescinding of the prohibition against the eating of meat in the late 1860's, the consumption of meat remained extremely low for another century. Until very recent times meat (niku in Japanese) usually meant pork in eastern Japan (roughly from Tokyo to Hokkaido) and beef in western Japan (from Nagoya/Osaka to Kyushu). Historically, and even today, the people of the Kinki Region (Kyoto, Kobe, and Osaka) have been the heaviest beef eaters.

For millennia the people of Japan lived on a diet of rice, vegetables, and seafood eaten with hashi (chopsticks). Although the meat taboo was removed over a hundred years earlier, by 1980 the average Japanese ate only 5.1 kg of beef (carcass weight basis). In some Western countries, where income levels are comparable with those in Japan, the average person commonly devours ten

times this quantity each year. Although the younger generation has grown up with Western cuisine, knife and fork, most Japanese still enjoy beef best when it is prepared as very thin slices, cooked in the traditional manner and eaten with hashi.

From about 1955 onwards, the mechanization of rice cultivation led to an increase in the availability of beef, as large numbers of draught cattle were fattened and slaughtered. At the same time the rapid economic growth, which started with the Korean War boom, was gaining momentum. People could afford the luxury of meat more often.

THE ORIGINS OF KOBE BEEF

The creation of genuine Kobe (or Matsuzaka or Omi) beef is a mystical folk art which may have been practiced as an underground cult before 1868. Some sources claim that certain daimyo ▶

and even some shoguns enjoyed especially fattened beef from Hihone hab (now Shiga Prefecture, the home of Omibeef). Most Japanese believe, however, that the art of producing Omi, Matusaka, or Kobe beef cannot be traced back to feudal times.

Kobe beef traditionally comes from Wagyu cattle. “Wa” is a very old Japanese language term for Japan, or things Japanese, and one of the meanings of “gyu” is beef, with an “on

the hoof” connotation. There are four commercial breeds of Wagyu: These four breeds are now considered indigenous to Japan, but are not genuinely native cattle. There are two isolated populations of native cattle in existence. The Mishima wild cattle on Mishima Island (located in the Sea of Japan off Yamaguchi Prefecture) have never been crossed with modern European breeds. While they represent a genuine genetic curiosity, as of 1983 there were fewer than 40 head. The

second, and more numerous, are a group of wild cattle on Kuchinoshima Island south-west of Kagoshima Prefecture. The progenitors of both the Mishima and Kuchinoshima cattle were probably brought to Japan by the ancestors of the modern Japanese people more than 2,000 years ago. Biochemical and genetic tests indicate that the native cattle are more closely related to the cattle of Northern Europe and Scandinavia than they are to the cattle indigenous to Taiwan, the Philippines, and other South East Asian Countries.

The four modern Japanese breeds are the result of a substantial infusion of European blood during the Meiji Era, together with a government-sponsored selection programme initiated in 1919. For several decades prior to 1910, there was a great interest in importing European breeds to cross with native cattle. The basic aim was to improve the native strains for draught purposes, but better meat production was also a consideration. Exotic breeds were extremely popular and the price of pure-bred and cross-bred exotic animals often reached unreasonable levels, until the bubble burst in 1910. After this date, the importation of European breeds went out of fashion.

Name of modern breed	Region and prefecture in which the breed developed	European breeds crossed with native cattle	% of national beef breed herd (1981)
Japanese Black	Kinki – Kyoto	Brown Swiss	87%
	Kinki – Hyogo	Shorthorn, Devon, Brown Swiss	
	Chugoku – Okayama	Shorthorn, Devon	
	Chugoku – Hiroshima	Simmental, Brown Swiss, Shorthorn, Ayrshire	
	Chugoku – Tottori	Brown Swiss, Shorthorn	
	Chugoku – Shimene	Devon, Brown Swiss, Simmental, Ayrshire	
	Chugoku – Yamaguchi	Devon, Ayrshire, Brown Swiss	
	Shikoku – Ehime	Shorthorn	
	Kyushu – Oita	Brown Swiss, Simmental	
	Kyushu – Kagoshima	Brown Swiss, Devon, Holstein	
Japanese Brown	Shikoku – Kochi	Simmental, Korean Cattle	9%
	Kyushu – Kumamoto	Simmental, Korean Cattle, Devon	
Japanese Poll	Chugoku – Yamaguchi	Aberdeen Angus	< 2,000 breeding females
Japanese Shorthorn	Tohoku – Aomori	Shorthorn, Dairy Shorthorn	
	Tohoku – Iwate	Shorthorn, Dairy Shorthorn	
	Tohoku – Akita	Shorthorn, Devon, Ayrshire	

Source: Derived from Kiyoshi Namikawa, “Animal Genetic Resources in Japan,” in S. Barker (ed.). Proceedings of the SABRAO Workshop on Animal Genetic Resources in Asia and Oceania. NEKKEN SHIRYO No. 47, Tropical Agricultural Research Centre, MAFF, Japan

After World War I, the Japanese Government decided to encourage the selection and registration of cattle exhibiting superior traits of both native and foreign types. There was a considerable gene pool to draw upon, as a wide range of European blood had been introduced to Japan. This variation, together with the original differences among the native cattle, permitted selection according to different criteria in various parts of the country. After World War II, the National Government moved to rationalize the registration process and formally recognized three major Wagyu types or breeds: Japanese Black, Japanese Brown, and Japanese Poll. ▶

LOUMA BOERDERY

WAGYU STOET

ONS STORIE

Louma Boerdery het in 1986 ontstaan en is hoofsaaklik in die Thabazimbi distrik (Limpopo) gestasioneer. Ons het ook nou ons boerdery uitgebrei na Lindley area (Oos-Vrystaat).

Ons diversifiseer in verskillende boerdery aktiwiteite naamlik graan-, wild- en veeboerdery.

In Maart 2016 het ons met ons eerste Wagyu-kudde vanuit Brian Angus se Woodview-kudde begin.

Die rede waarom ons die Wagyu-ras gekies het, is omdat ons deur verskeie navorsing die grootte van die bedryf gesien het in terme van ekonomiese volhoubaarheid en die internasionale mark.

Ons glo dat dit vanuit 'n Suid-Afrikaanse ekonomiese beleggingsoogpunt 'n goeie plek is vir 'n Suid-Afrikaanse veeboer om in te belê.

OUR STORY

Louma Boerdery originated in 1986 and is mainly stationed in the Thabazimbi district (Limpopo). We are currently also farming in the Lindley area (Eastern Free State).

We have diversified into different farming activities namely grain, game and livestock farming.

In March 2016 we started our first Wagyu herd from the Woodview herd of Brian Angus.

The reason we chose the Wagyu breed is because we see growth in terms of economic sustainability and a international market.

We believe that from a South African economic investment point of view, it is a good place for a South African cattle farmer to invest in.

Uleis vir die toekoms. Meat for the future.

◆ The National Wagyu Cattle Registration Association was established in 1948.

The Japanese Black breed included several fairly distinct types, and this is still the case today (e.g. Tottori, Tajima, and Hiroshima strains). The Japanese Shorthorn was not formally established until 1957.

After careful selection and breeding over the last five decades, there are slight differences in the concept of the “true type” for each breed, but many similarities. All four breeds have been selected for beef production alone for more than forty years. In all four breeds the aim is to produce a medium-sized, beef-type animal. All of the breeds are humpless but the bulls tend to develop a marked crest. While the ideal mature body weight and height at the withers differ marginally between the four breeds, the targets for the Japanese Black are typical:

While it is hard to generalize, two traits of the Japanese Black often cited as

disadvantageous are their narrow pin bones and their relatively poor milking capacity. The narrow pin bones create calving difficulties if the cows are crossed with bulls of the large-framed European breeds (such as Holstein or Charolais). The poor milking ability increases the costs of raising feeder calves since the calves often need artificial supplements.

On the other hand, the Japanese Blacks (in particular the Tajima strain) are noted for their capacity to produce beef with a high degree of fat marbling (or sashi). It is this characteristic more than any other which accounts for the steady increase in the popularity of the Japanese Black breed.

According to the website of the California BBQ Association, “In order

	Male	Female
Body weight (kg)	940	560
Wither height (cm)	142	128

to protect its domestic beef industry, the Japanese government imposed strict laws that prohibited the export of any living Japanese Wagyu cattle. However, in 1976, four Wagyu animals were imported into the U.S.: two Tottori Black Wagyu and two Kumamoto Red Wagyu bulls. Then in 1993, two male and three female Tajima cattle were imported, and 35 male and female cattle (consisting of both red and black Wagyu) were imported in 1994.

“Most Kobe Beef today is bred and raised in California and Australia. For example, Harris Ranch in California is contracted with beef producers in Kobe to breed and raise their cattle in California, where land and grain is relatively inexpensive. The cattle is raised and fed under the exacting specifications for Kobe Beef. When the cattle is almost ready for slaughter, it is shipped to Kobe, Japan, where its feeding is completed, and the cattle is slaughtered.”

**BREEDERS OF TOP QUALITY, FULL-BLOOD
AKAUSHI AND BLACK WAGYU**

WAGYU OUTSIDE OF JAPAN

FOUNDATION OF BLACK WAGYU, RED WAGYU AND AKAUSHI THAT WERE EXPORTED FROM JAPAN

A TOTAL OF 167 BLACK WAGYU IS KNOWN TO HAVE BEEN EXPORTED.

21 calves registered from Japanese AI sires were born after the arrival of the heifers. 16 Red Wagyu/Akaushi bulls and heifers were exported and 6 registered births resulted. A total of 221 Wagyu cattle brought genetics from Japanese Black and Japanese Brown and they formed the basis of all Wagyu and Akaushi in USA, Canada and Australia. The second migration from those countries commenced globally from the late 1990s to Europe, South America then South Africa. Finally, herds have become established across the Pacific and Asia.

Four bulls were sent from Japan by Morris Whitney in 1976. Colorado University took semen collections then they were bought by Wagyu Breeders Inc. There were no Wagyu females in America so the original two Wagyu Black (Mazda from Tottori and Mt Fuji from Hyogo) and two Wagyu Red bulls (Rueshaw and Judo from Kumamoto) were joined to Angus, Holstein, Hereford and Brangus cows in Texas.

By 1991 the highest percentage Wagyu bull in the USA was 63/64 and it was estimated that there were less than 300 Wagyu crossbred females of breeding age that were 3/4 Wagyu or higher. In about 1991 the narrow genetic base was widened when semen from the fifth bull Itotani was brought to Canada by Lakeside Industries at Brooks. In the fourth generation, the American Purebred (15/16) is obtained and contains 93.75% Wagyu genetics.

The Mannett Group (later to become World Ks) imported three Black Wagyu females (Suzutani and Rikitani – both Tajima - and Okutani - 75% Tajima and 25% Shimane) and two bulls (Michifuku - 94% Tajima - and Haruki 2 - 56% Tajima and 19% Shimane) in 1993. The first Fullbloods to be born in June 1994 outside Japan were Rikihari in Canada, then Beijiuro and Suzutani followed in USA. Later in the year the first live exports were transported from USA to Wally Rae in Australia.

The Mannett Group imported four black females (Okahana, Nakayuki, Kanetani and Nakagishi 5) and two black males

(Kenhanafuji and Takazakura) in 1994. Calves born after arrival were Tanitsuru, Nakazakura, Kitaguni Jr and Reiko.

In this consignment were Red Wagyu imported by Dr AI and Marie Wood from selections made by Mr Yikio Kurosawatsu and Dr King in Kumamoto Prefecture.

Nine red females (Namiko, Ume, Namoi, Akiko, Haruko, Fuyuko, Dai 3 Namiaki, Dai 9 Koubai 73 and Dai 8 Marunami) and three red bulls (Shigemaru, Tamamaru and Hikari) are registered in the AWA but some reports state that only seven heifers were imported of which three were pregnant on arrival in USA. Calves born to AI (from Japanese sires Namimaru and Dai 10 Mitsumaru) were Big AI, Kaedemaru, Momigimaru, Ringo, 504 and 505. After the 180 days incubation that was required for quarantine, Namoi, Dai 3 Namiaki, Kaedemaru and Momigimaru went to Ontario in Canada. The remainder of the Red Wagyu/Akaushi herd in USA was sold to Englewood Farm in Texas. Subsequently most were transferred to Heart Brand.

Japanese Venture Partners imported three black bulls (Kikuyasu, Fukutsuru, Yasutanisakura), ten black females (Chisahime 662, Chiyofuku 992, Fukutomi 990, Kikuhana 298, Shigehime 208, Tokuhime 486, Yasufuji 1/4, Yoshifuku 2 and Yuriko 1), and two red heifers (Kunisakae and 27 Homare).

Mr Shogo Takeda exported 35 black females, many in calf, and five black bulls (Itomichi 1/2, Kikuhana, Itohana 2, Kinto and Terutani) in 1994. There are numerous females that have been registered with births during this period. Mannett imported 7 black females (Taguchi 9, Nakahana 5, Mitsutaka, Okuito 9, Hanateru 9, Rabito and

TAJIMA

Originating in the Hyogo Prefecture of Japan, this strain is renowned to produce carcasses with very high marble scores. Tajima Wagyu are characterised by smaller frames with high marbling qualities, however typically cows have lower milking and lower growth rates than other strains. Famous Tajima sires include Michifuku and Terutani.

SHIMANE

Originating in the Shimane Prefecture of Japan, this strain is characterised by well-balanced qualities including good growth, fertility and milking rates. Dai 7 Itozakura is probably the most famous of the Shimane line. He was an outstanding sire with high marbling capabilities and excellent growth rates. His female offspring are excellent milkers.

TOTTORI OR KEDAKA

Originated in the Tottori Prefecture of Japan, this strain is characterized by larger framed cattle with good growth rates, good milk supply and overall balance. The famous Tottori bull Kedaka was born in 1959 and is considered to be one of the outstanding sires in this Tottori strain.

KOCHI & KUMAMOTO (RED WAGYU)

Originating in the Kumamoto Plateau in Kyushu Japan, these strains were strongly influenced by the Hanwoo Korean breed and European Simmental breed. These animals are characterized by their red colour with large frame size and good milk supply. These strains still produce marbling however are generally not as highly marbled as black strains such as Tajima

◀ Hisako) with one black bull (Yasufuku Jr) in 1997. Calves were Taguchifuku, Kotomichan and Kousyun.

Chris Walker of Westholme imported 25 black females and three black males (Hirashigetayasu, Itomoritaka and Kitateruyasu Doi) to USA from ET Japan Company in Hokkaido in 1997. The following year another 59 females arrived together with semen from three black bulls (Shigefuku, Dai 6 Seizan and

Kitatsurukiku Doi). The bulls remained but the females were exported to Australia. This consignment was diverse with 44 Shimane and 28 Kedaka with 12 Tajima so injected milk and size with marbling. Dams which bred in Australia include: Hatsuko, Itoreiko, Kazuaki, Kitahikari 97/1, Kitakazu, Kitaokumi, Kitasakaedoi, Kitasekitori, Kitatizuru 2, Kunikiku 96, Masako, Masatoshi 2, Sakaehikari, Sekinakada 22, Sekiyuhou, Takakuni, Takashigedoi, Yamafuji,

Yamaketafuji 3 and Yuriuhoi.

Takeda Farms imported 6 black bulls (Kikutsuru Doi, Itoshigefuji, Itoshigenami, Mitsuhikokura, Kikuterushige, Itozuru Doi).

A Mishima bull (Kamui) - a native cattle breed from Mishima Island - was in this consignment. The indigenous cattle population on Mishima Island had been eliminated by Rinderpest disease in 1672. A few Japanese Black were transported over from mainland Japan to re-establish the herd, which has been in-bred for more than 25 generations. Mishima has high marbling but is smaller than the conventional Wagyu breeds of today. Kamui is registered as a Base animal (B115 with date of birth 28th August, 1991) to enable crossing with Wagyu. His progeny out of registered Fullblood dams are registered as Wagyu percentage (50% Wagyu) by the American Wagyu Association. The Takeda herd in USA was subsequently sold to Mr Gary Yamamoto in Canada.

THE DIFFERENCE BETWEEN KOBE AND WAGYU BEEF

FOUNDATION OF BLACK WAGYU, RED WAGYU AND AKAUSHI THAT WERE EXPORTED FROM JAPAN

By John Cecala www.buedelmeatup.com

WAGYU BEEF IS INTENSELY MARBLED WITH SOFTER FAT, HAS HIGHER PERCENTAGES OF MONOUNSATURATED FATS, OMEGA-3 AND OMEGA-6 FATTY ACIDS AND IS LOWER IN CHOLESTEROL THAN COMMODITY BEEF. THE COMBINATIONS OF THESE FATS DELIVER A DISTINCTIVE RICH AND TENDER FLAVOR COMPARED TO OTHER BEEF.

The most exclusive Wagyu in the world comes from Kobe, Japan. People use the terms Kobe and Wagyu beef interchangeably in the U.S. thinking it refers to the same premium imported Japanese beef, when it does not.

ALL KOBE IS WAGYU, BUT NOT ALL WAGYU IS KOBE

Many restaurant menus feature “Kobe Burgers” or “Kobe Steaks”. The internet is flooded with on-line companies offering Kobe Beef, Kobe Burgers, Kobe-Style Beef, and Wagyu beef. The truth is authentic Kobe beef is very rarely seen on restaurant menus in the USA.

Legitimate Kobe beef is priced around \$200 per portion for a steak, and \$50 for a burger. If you see something on a menu referred to as Kobe priced less than that, it is most likely domestic or imported Wagyu.

How can you tell the difference?

KEY TERMS & DEFINITIONS

Kobe A city in Japan and the capital city of the Hyōgo Prefecture. Kobe is also considered a region of Japan like Champaign is a region in France, and Parma is a region in Italy.

Wa Japanese or Japanese Style

Gyu The Japanese word for a Cow or Cattle

Wagyu Japanese or Japanese Style Cattle. Japanese cattle consist of four breeds: Japanese Black, Japanese Brown, Japanese Poll, and Japanese Shorthorn. Ox-like in structure, these breeds are bred for field work.

Tajima-Gyu The cow that Kobe beef comes from which is classified as a Japanese Black breed.

Kokusan-Gyu Refers to cattle which are raised domestically in Japan. Regardless of the country or breed, cattle are classified as “Kokusan-Gyu” if they have spent more than half of their life in Japan.

Japanese Meat Quality Score Japanese quality meat scores are qualified by four factors: marbling, color and brightness, firmness and texture, and fat color, luster and quality. Each factor is graded from 1 to 5, with 5 being the highest score.

BMS Beef Marbling Standard.

BMS is a score rating given to red beef for the amount of intramuscular flecks of fat which give the meat a marble like pattern.

FACTS & CRITERIA

Under Japanese law, Kobe beef can only come from Hyōgo prefecture (of which Kobe is the capital city) of Japan.

Kobe cows are fed a special diet of dried pasture forage and grasses such as rice straw with nutrition-rich feed supplements made by blending soybean, corn, barley, wheat bran, and various other ingredients. They are not fed pasture grass.

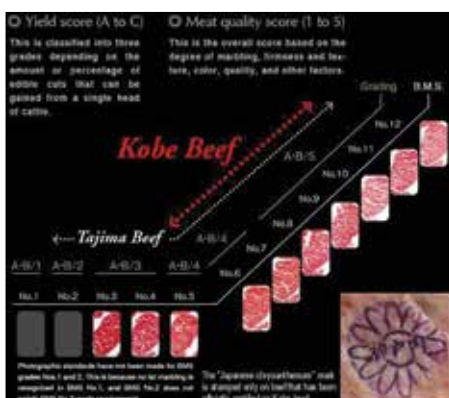

To be authentic certified Japanese Kobe Beef the following criteria need to be met:

- Breed of cattle is pure lineage Tajima (Tajima-Gyu), between 28-60 months of age, born, raised and slaughtered in the Hyogo Prefecture of Japan.
- Certified as having a yield score of A or B.
- Japanese Meat Grading Association quality score of 4 or 5.
- BMS score of 6 or higher on the Tajima-Gyu marble grading scale of 1-12.
- Has the “Japanese Chrysanthemum” ▶

◀ seal officially certifying it as Kobe Beef.

This certification process is so strict that when the beef is sold in stores and restaurants, it must carry a 10-digit number to identify the origination of the Tajima-Gyu cow.

Kobe Beef, Kobe Meat and Kobe Cattle, are also all trademarks in Japan. The United States does not recognize these trademarks thus promoting free use of the term "Kobe" in the US without

regard to Japan's strict standards. Consequently restaurants and retailers market various types of American or Australian Wagyu beef as "Kobe beef".

Japanese beef was actually banned from being imported into the United States from 2009 until August of 2012. (The "first-ever" Kobe shipment is now on its way to the US according to Meating Place.) What we see most of domestically, is American Wagyu or Australian Wagyu (Kobe Style) beef.

AMERICAN WAGYU (KOBESTYLE)

Four Wagyu bulls were brought to the USA in 1976 from Japan's Tottori Prefecture for cross breeding with Angus cattle creating the American Wagyu Kobe Style Beef. The crossbred Wagyu cattle were fed a mixture of corn, alfalfa, barley and wheat straw mimicking the Japanese cattle diet. In the mid 1990's, about 40 more full blooded Wagyu male and females were

imported to the US for breeding.

There a few domestic ranches raising pure blood American Wagyu beef today, however, most of what we see domestically are a Wagyu/Angus mixed breed. The Wagyu influence contributes to the intense marbling and the Angus influence contributes to the animal's size.

USDA MARBLE SCORING

The USDA scale for upper grade meat quality has 3 levels: Select, Choice, and Prime. Prime is the highest USDA grade. Roughly, 3% of traditional US cattle harvested are graded as Prime – equivalent to a Wagyu BMS score of 5. Over 90% of domestic Wagyu cattle grade out as at least Prime, with most reaching a BMS score of 7-8. Wagyu's intense marbling occurs from genetics and from the cattle spending more time on special feed, about 30 months as compared to commodity beef cattle

scoring range is 1 to 9 +. One of the most notable brands of Australian Wagyu beef is marketed under famed professional golfer and entrepreneur Greg Norman. Greg Norman Signature

which are fed about 24 months. The Strube Ranch in Pittsburg, Texas is a notable American producer of quality domestic Wagyu beef.

AUSTRALIAN WAGYU (KOBE STYLE)

Australia first imported Wagyu in 1990 and began a breeding program using artificial insemination. In the mid 1990's Australia imported full blooded Wagyu bulls and cows from the United States to enhance their Wagyu breeding program. Over the years, the Australian Wagyu breed has gained in strength and popularity for intense marbling and taste.

Different from the USDA and Japanese grading systems, the Ausie marble

Wagyu beef is sold under BMS 5-11. There are Canadian and European Wagyu producers, but most of the US

market is supplied through Australian imports and domestic purveyors.

Uber expensive and delicious, Wagyu's American popularity is growing. Remember, true authentic Japanese Kobe Wagyu is still a rarity in the US. When you see it on it a menu, judge it by price. Ask your server if they can attest to the Kobe quality. If their response is at least somewhat knowledgeable to facts in this article, odds are it is authentic.

SERVICE EXCELLENCE

At BKB we value the importance of trust. Trusting that the rains will return and that the land will produce for those who nurture it. Knowing that trust cannot be bought, but rather earned over time through our actions and our commitment to you, through the good times and bad. We take pride in the relationships we have built with generations of clients, each underpinned by integrity and bound through a look in the eye and the shake of a hand.

ABSOLUTE GENETICS

Superior Bovine Reproduction

**ABSOLUTE GENETICS FORMS PART OF
ABSOLUTE WAGYU PTY LTD,
WHICH IS THE CULMINATION OF
A SHARED PASSION
AND VISION FOR THE WAGYU BREED.**

Embryo flushing, and transfer is seen as the quickest and most cost-effective method of increasing the rate of genetic improvement within a group of animals.

We specialize in:

- Flushing embryos from a superovulated donor cow.
- Transferring of the embryos to synchronised recipients.
- Freezing embryos to conserve or sell your superior genetics
- Collection of bull semen for own use or to freeze for conservation or sale.
- Imports of superior genetics, globally, for improved breed diversity.

is a PROUD SUPPLIER of

FIRST EVER **LIVE** WEBCAST AUCTION
in the livestock industry on the

WAGYU 14 April 2018 Livestock Auction

African Wildlife Auctions (AWA) was established in 2014 through a joint venture between two major players in the South African auction industry. AWA online technology business unit Wildlife Auctions has become one of the dominant players in both online sales and agent marketing of game and wildlife in Southern Africa over the last two years.

African Wildlife Auctions has grown substantially since inception when it was considered a small player, to becoming the dominant market player in the plains game market. AWA's rapid growth now sees it selling more than 1 000 plains game on a monthly basis. The dominance achieved in this arena is a result of identifying a gap in terms of 'looking after' the smaller game breeders. The monthly plains game auctions are integral to AWA's success, and the market dominance in this area is supplemented by monthly auctions of more rare game offerings. This two pronged approach will ensure that AWA remains the dominant player in plains game, but also sets it up to become the dominant player in the rare game market, expanding the live webcast online auction technology.

AWA's innovation in the game industry through the development of an internet portal www.wildlifeauctions.co.za allows buyers to participate in live online auctions (live webcast auctions). AWA is the ONLY company and auction house that has this technology offering in the market, which furthermore live streams auctions, available to anyone, anywhere in the world free of charge. AWA is one of only three companies in South Africa with the ability to video stream events. The online portal went through a rigorous two year development and testing period in order to ensure that it was fully compatible with the realities faced in South Africa in terms of broadband access and quality. This has enabled the company to overcome numerous technology challenges and provide a platform through which all players could easily interact with each other, tech savvy or not. In the past year of operation, AWA has seen excellent uptake of the platform with 30% of all game on offer sold via the online platform. It is anticipated that this unique offering will grow to 50% within the next year, and with no other players on the horizon, AWA looks set to further strengthen its market dominance in the future.

AWA announced this week the expansion of its online technology for live webcast auctions into the Livestock Industry. AWA's phenomenal growth in the online live webcast auctions in the game industry created the opportunity to expand this online technology into the Livestock industry through its portal www.livestockauctions.co.za. The new venture will create further opportunities for the livestock industry to reap the benefit of this online technology now available.

The Livestockauctions.co.za website is the first of its kind in South Africa. It has been developed to facilitate transactions between livestock dealers, livestock farmers/sellers and livestock buyers. The website facilitates the buying and selling of livestock online thru several auction mediums and processes. The Livestockauctions.co.za website has been specifically designed to assist the livestock industry in alternative mediums to sell livestock on an internet platform. The website also provides the means for livestock farm owners to sell their livestock without the involvement of a middle man or agent.

Visit the website www.livestockauctions.co.za to register for the first ever live webcast auction in the livestock industry on the 14 April 2018 at the Woodview Wagyu Auction

www.livestockauctions.co.za

VEILINGSREËLS, BEDINGE EN VOORWAARDES

- Hierdie veiling word gehou onder die beheer van BKB Beperk/ BKB van Wyk (Edms) Beperk/ BKB Louw (Edms) Beperk (hierna "die Afslaer" genoem) met besighheidspersele geleë te: H/V JJ Hadebe- & Carolina Straat, Frankfort, 9830
- Die Afslaer word hier deur benoem deur die Koper en Verkoper om op te tree vir en namens die Koper en Verkoper as agent in ooreenstemming met Artikel 54 van die Belasting op Toegevoegde Waarde Wet, 1991, ten opsigte van alle belasting fakture, krediet en / of debiet notas ten opsigte lewendehawe, wild en/of ander goedere aangebied by die veiling of enige koste van vervoer en versekering spremies wat namens die Koper en Verkoper betaal is.
- Die reëls van hierdie veiling is ooreenkomstig met die bepalinge van Art 45 en alle relevante regulasies tot die Verbruikers Beskermings Wet Nr 68 van 2008.
- Vir groter duidelikheid, bepaal Art 45(1-4) soos volg:
 - 1 Wanneer na veilings verwys word, sluit dit eksklusie verkopings gemagtig deur 'n hofbevel in, insover die hofbevel vereis dat die verkope van bates deur middel van 'n veiling moet plaasvind.
 - 2 Wanneer bates in lotte te koop aangebied word op 'n veiling, elke lot, tot die teendeel bewys word, geag word 'n aparte transaksie te wees.
 - 3 Verkope deur middel van 'n veiling word as finaal beskou wanneer die Afslaer die verkoop van 'n spesifieke item of lot as voltooid aankondig deur die val van die hamer of op enige ander gebruiklike manier. Tot en met hierdie aankondiging, kan 'n bod herroep word.
 - 4 Vroegtydige kennis moet gegee word as die veiling en/of lot onderworpe is aan:
 - 4.4.1 n Reserwe of minimum bod; of
 - 4.4.2 Die reg van die eienaar of Afslaer om op die veiling te bie, of enige ander persoon namens die eienaar of Afslaer te bie.
- Tot en met die toestaan van 'n bod deur die Afslaer, soos bedoel in Art 45(3), is die Afslaer geregtig om enige bod te verwerp wat nie aan die regulasies voldoen nie en die hoogste bod aan te wys.
- Hierdie veiling is nie 'n absolute veiling nie, maar onderworpe aan reserwe pryse vasgestel deur die Verkoper en uitgewys deur die Afslaer voor die verkoop van elke bate of lot.
- Hierdie veiling sal op die datum en tyd begin soos geadverteer of gepubliseer en sal nie uitgestel of later begin om enige lid of groep van die publiek in staat te stel om aan die veiling te mag deelneem nie.
- Indien die Afslaer bewys raak van enige fout op advertensie materiaal of enige ander publikasie of enige wysiging in hierdie veilingsreëls, sal die Afslaer spesifiek die wysigings in die reëls uitwys sowel as die foute in die advertensie of publikasie.
- Enige persoon wat die veiling bywoon om self te bie moet, voor die aanvang van die veiling, registreer as 'n Koper op die kopersrol en voldoen aan die vereistes soos voorgeskryf in Hoofstuk 1 van FICA 2001 en die kopersrol/koperskaarte onderteken.
- Enige persoon wat die veiling bywoon om namens 'n ander persoon te bie, moet behoorlik daartoe gemagtig word deur middel van 'n magtigingskrywe van sy prinsiaal en beide die persoon en sy prinsiaal moet voor die veiling op die kopersrol registreer deur die nodige informasie te verskaf soos voorgeskryf in Hoofstuk 1 van die regulasies uitgereik in terme van FICA 2001 ten opsigte van die bewys van identiteit en moet die kopersrol/koperskaarte onderteken.
- Waar die prinsiaal 'n maatskappy is, sal die magtigingskrywe op die briefhoof van die maatskappy verskyn en vergesel word met 'n gesertifiseerde afskrif van die resoluasie wat die persoon magtig om so te doen. (Vir doeleindes van hierdie reël, sluit die verwysing na maatskappy ook 'n verwysing in na enige juridiese persoon, insluitend vennootskappe, trusts of regsliggame).
- Alle Kopers het 'n reg om die bates te koop aangebied te inspekteer en die Afslaer sal redelike tyd en toegang hiervoor toelaat voor aanvang van die veiling.
- Alle lewendehawe, wild en bates word voetstoots verkoop en die Kopers geniet nie die beskerming soos uiteengesit in Art 55 en 56 van die Verbruikers Beskermings Wet nie.
- Enige inligting verstrekk met betrekking tot die gehalte, taling, geslagsboom, ouderdom, datum

- van dekking, kondisie, reprodiktiewe status of vermoë, vrugbaarheid, gesondheidstoestand, produksievermoë, massa of enige aspek van die lewendehawe en/of wild, word deur die Verkoper verstrekk en enige wanvoorstelling deur die Verkoper is sonder die medewete of samewerking van die Afslaer. Enige verhaalsreg voortsprekend uit so 'n wanvoorstelling sal uitsluitlik teen die Verkoper wees.
- 'n Bod gemaak sluit nie Belasting op Toegevoegde Waarde in nie. BTW sal, waar van toepassing, by die prys gebie gevoeg word op alle fakture wat uitgereik word.
- Alle verkope geskied kontant en die koopprys is onmiddellik betaalbaar aan die Afslaer na aanvaarding van die bod, tensy vooraf anders met die Afslaer ooreengekom is. Enige kontantbetalings is verder onderworpe aan kontant of enige ander hanteringsfooe. Sou die koper egter versuim om binne 7 dae van lewering te betaal, is BKB geregtig om rente by die uitstaande bedrae te voeg bereken teen die huidige bank prima koers plus 5%, maandeliks bereken en gekapitaliseer.
- Indien die Koper nie die koopprys onmiddellik betaal nie en verder geen gepaste reëlins met die Afslaer getref het nie, sal/kan die Afslaer die verkoop kanselleer en die bate of lot as onverkoopte bates hanteer en dit of weer aanbied op die veiling of by afloop van die veiling uit die hand uit namens die Verkoper verkoop, afhangend van die Verkoper se mandaat aan die Afslaer.
- Eiendomsreg in die lot sal gevestig bly in die Verkoper totdat die koopprys daarvan ten volle aan die Verkoper verrek is, met die voorbehoud dat risiko in die bates of lot reeds by toestaan van die bod oorgaan na die Koper soos uiteengesit in klousule 23.
- Indien die Koper wel vooraf gepaste reëlins met BKB getref het, magtig die Koper BKB hiermee om die koopprys, koste van vervoer en versekering of enige ander ooreengekomte koste, minus BKB se kommissie, namens die Koper aan die Verkoper en ander diensverskaffers te betaal, in welke geval die gemelde koopprys, en koste geag word gelde geleen en voorgeskiet te wees, die terme waarvan ooreengekom is met die Koper in 'n aparte kredietooreenkoms of koopoooreenkoms. Alle betalings in terme van hierdie klousule wat deur BKB gemaak moet word aan die Verkoper namens die Koper sal deur BKB gemaak word na verstryking van 5 werksdae vanaf datum van lewering aan die Koper. Betalings vir verstryking van die 5 werksdae deur BKB aan die Verkoper word gemaak in die uitsluitlike diskresie van BKB en is nie 'n afdwingbare vergunning nie.
- Solank enige bedrag hierkragtigens deur die Koper aan BKB verskuldig is, mag die Koper, waar die bates die onderwerp van sekuriteit is vir die Koper se kredietfasiliteit met BKB, nie afstand doen van die besit van die bates nie en mag die Koper nie die bates of enige van sy regte of verpligtinge kragtigens hierdie ooreenkoms seeder, afstaan, verpand of andersins beswaar, verkoop, verveem of aanbied om die voornoemde te doen, of toelaat dat die bates onderworpe raak aan enige retensiereg, hipoteek, pand of ander beswaring of geregtelike beslaglegging wat ookal die oorsaak daarvan nie. BKB kan sy regte en belange hierin seeder, afstaan of verveem, sonder afstanddoening of benadeling van sy reg van invordering van enige gelde aan BKB verskuldig.
- Waar die Verkoper by die aangaan van hierdie veiling reeds 'n bedrag verskuldig is aan BKB of enige filiaal maatskappy of firma van BKB, ongeag die skuld oorsaak van sodanige verskuldigheid, magtig die Verkoper BKB onherroeplik om die koopprys hiervan (minus BKB se kommissie) teen die Verkoper se rekening te krediteer, synde betaling van die koopprys namens die Koper te wees.
- Waar BKB, in terme van die 'n kredietooreenkoms gelde geleen of voorgeskiet het aan die Koper vir die betaling van die koopprys van die bates en die vervoerkoste en versekeringspremies, sal geen verweer hoegenaamd wat die Koper teen die Verkoper of vervoerkontraakteur of verskeeraar het, geopper word teen BKB nie en sal die Koper steeds verplig wees om alle bedrae, tesame met ander rente en kostes kragtigens die kredietooreenkoms of koopoooreenkoms verskuldig aan BKB te betaal. Die bepalinge van hierdie klousule plaas geen beperking op die Koper se reg om regte/medies wat hy mag hê teen die Verkoper, vervoerkontraakteur of

versekeeraar uit te oefen nie.

- Nog die Koper nog die Verkoper sal met betrekking tot enige bedrag hierkragtigens verskuldig geregtig wees om skuldvergeliking toe te pas of betalings te weerhou ten opsigte van eise teen mekaar of teen BKB.
- Elke lot sal onmiddellik nadat die bod toegestaan is geag word as geleuer aan die Koper en sal daarna op die uitsluitlike risiko van die Koper wees, wie op eie koste die lot of bate van die veilingsterrein sal verwyder. Verwydering van enige bates of lotte sal egter slegs toegelaat word na betaling van die koopprys deur die Koper tensy die gestemte reëlins met die Afslaer getref is en hy toegestem het tot verwydering.
- Die Afslaer sal slegs die rede vir die veiling aankondig indien dit enige rede anders is as 'n vrywillige verkoop van goedere deur die eienaar.
- Die kopersrol en die vendurool is beskikbaar vir geregistreerde Kopers vir inspeksie deur middel van 'n skriftelike versoek en met goeie rede, gedurende besighedsure by die besighedspersele van die Afslaer.
- Hierdie veilingsreëls sal slegs by die veiling uitgelees word indien dit nie beskikbaar was aan die publiek by die besighedspersele van die Afslaer nie. In die geval van lewendehawe en/of wild veilings, bly die veilingsreëls onveranderd en is dit in die algemeen beskikbaar by die besighedspersele van die Afslaer en op die Afslaer se webtuiste.
- BKB sal onder geen omstandighede hoegenaamd deur enigiemand aanspreeklik gehou word vir enige verlies of skade van enige aard hoegenaamd, hetsy direkte of indirekte skade of gevolgschade of andersins gely deur enigiemand, indien die lewendehawe en/of wild op die veilingsterrein onder kwarantyn geplaas word as gevolg van die aanwesigheid van 'n beheerde viesiekte onder enige lewendehawe en/of wild op die veilingsterrein nie. BKB sal die reg hê om die veiling te staak en elke koop nietig te verklaar en geen party hoegenaamd sal enige verhaalreg teen BKB hê met betrekking tot die uitoefening van hierdie bevoegdheid van BKB nie.
- Partye wat enige permitte, verwyderingsertifikate, dokumente van identifikasie of enige ander statutêre voorgeskrewe dokument benodig, is self aanspreeklik vir die verkryging daarvan. Enige opdragte aan die Afslaer met betrekking tot die laai, en/of vervoer en/of keuse van vervoerkontraakteurs en/of versekering en/of keuse van verskeeraars en/of versorging van die lewendehawe en/of wild of goedere voor of na afloop van die veiling, word uitgevoer op die algehele risiko van die Koper of Verkoper, na gelang van die geval en die Afslaer sal nie aanspreeklik gehou word vir enige verlies of skade van enige aard hoegenaamd, hetsy direkte, indirekte, gevolgschade of andersins, wat gely mag word as gevolg van enige opdragte van 'n Verkoper of Koper uitgevoer deur die Afslaer. Die Afslaer aanvaar egter verantwoordelikheid soos bedoel in Art 65(2) van die Verbruikers Beskermings Wet terwyl die goedere of lewendehawe en/of wild onder beheer van die Afslaer is. Enige ooreenkoms wat die Afslaer met die vervoerondernemer of verskeeraar mag aangaan, word deur die Afslaer aangegaan as die verteenwoordiger van die Koper of die Verkoper, na gelang van die geval. Alle vervoerkoste en versekeringspremies is vooraf betaalbaar aan die Afslaer in kontant tensy reëlins tot die bevrediging van die Afslaer hieroor getref is.
- Die Koper en die Verkoper stem toe tot die jurisdiksie van die Landdroshof soos beoog in Artikel 45 van Wet Nr 32 van 1944 ten opsigte van enige aksie wat die Afslaer teen die Koper of Verkoper mag instel, ondanks dat die aangeleentheid, eis oorsaak, bedrag of waarde die regspraak van daardie Hof mag oorskry, wat kragtigens Artikel 28 van die voornoemde Wet jurisdiksie ten aansien van die Koper of Verkoper het. Nieteenstaande die voorafgaande, sal die Afslaer in sy uitsluitlike en absolute diskresie die reg hê om 'n regsding in enige Hooggeregshof van bevoegde jurisdiksie in te stel.
- Enige regskoste wat deur BKB aangegaan word as gevolg van enige nie-nakoming van die Koper of Verkoper se verpligtinge hierkragtigens, insluitende invorderingskommissie, sal deur BKB verhaal word van die Koper of Verkoper, nagevang van die geval, op die skaal soos tussen prokureur en eie klient.
- Geen wysiging, verandering of novasie van of byvoeging tot hierdie voorwaardes en geen afstanddoening deur BKB van enige van sy regte hierkragtigens sal enigiens van krag wees tensy dit op skrif gestel is en onderteken is deur BKB nie.
- Geen toegewing of vergunning wat deur die Afslaer aan die Koper of Verkoper toegestaan word sal geag word om 'n afstanddoening te wees van enige van die Afslaer se regte hierkragtigens nie en

sodanige toeweging of vergunning sal nie geag word of vertolk word as 'n novasie hiervan nie.

34. Indien enige bepaling hiervan onwettig is of retrospektief onwettig gemaak word, sal daardie onwettige bepaling geag word as deelbaar van die res van die bepalings hiervan en pro non scripto.

RULES OF AUCTION, TERMS AND CONDITIONS

1. This auction will be held under the control of BKB Limited/ BKB van Wyk (Pty) Limited/ BKB Louw (Pty) Limited (hereinafter referred to as "the Auctioneer") with business premises situated at: Corner of: JJ Hadebe- & Carolina Straat, Frankfort, 9830

2. The Auctioneer is hereby appointed by the Purchaser and Seller to act for and on behalf of the Purchaser and Seller as agent in accordance with Section 54 of the Value-Added Tax Act, 1991, in respect of all tax invoices, credit and/or debit notes in respect of all livestock, game and/or goods offered at the auction or any costs of transport and insurances premiums paid for on behalf of the Purchaser and Seller.

3. The rules of this auction shall comply with the provisions of Section 45 and all relevant regulations to the Consumer Protection Act 68 of 2008.

4. For greater clarity Section 45(1-4) states as follows: a) In this section, "auction" includes a sale in execution of or pursuant to a court order, to the extent that the order contemplates that the sale is to be conducted by an auction.

b) When goods are put up for sale by auction, each lot is, unless there is evidence to the contrary, regarded to be the subject of a separate transaction.

c) A sale by auction is complete when the auctioneer announces its completion by the fall of the hammer, or in any other customary manner, and until that announcement is made, a bid may be retracted.

d) Notice must be given in advance that a lot or sale by auction is subject to:

i) A reserved or upset price; or

ii) A right to bid by or on behalf of the

owner or auctioneer, in which case the owner or auctioneer, or any one person on behalf of the owner or auctioneer, as the case may be, may bid at the auction.

5. Until the fall of the hammer as contemplated in Section 45(3) of the Act, any bid may be retracted or declined by the Auctioneer if not compliant with the regulations of the Consumer Protection Act.

6. The auction is not an absolute auction but subject to reserved prices settled by the sellers and as pointed out by the Auctioneer prior to the sale of the set asset or lot.

7. The auction shall take place at the date and time as advertised or publicised and will not be postponed or delayed to enable any member or group of the public to partake in the auction.

8. Should the Auctioneer become aware of any fault on advertising material or any other publication or amendment to these Rules of Auction, the Auctioneer will prior to the auction point out and when necessary amend such mistakes in the advertisement or publication.

9. Any person attending the auction to enter a bid, must prior to the auction register as a buyer on the bidders' roll and comply with the conditions as set out in Chapter 1 of FICA 2001. The purchaser shall sign the bidders' roll/card.

10. Any person who attends the auction to enter a bid on behalf of another person must be duly authorised thereto by means of a written letter of authority from its principal and such a person together with his principal must both register prior to the auction on the bidders' roll and provide all necessary information as required in Chapter 1 of the regulations issued in terms of FICA 2001 with regard to proof of its identity. The bidders' roll/card must be signed by such a person and on behalf of its principal.

11. Where the principal is a company the letters of authority shall appear on the letterhead of the company together with a certified copy of a resolution authorizing the person to bid on behalf of the company. (For purposes of this rule any reference to a company will include any reference to juristic person including partnerships, trusts or incorporated entities).

12. All purchasers have a right of inspection of all

goods put up for sale and the auctioneer shall provide reasonable time and access prior to the start of the auction for such an inspection.

13. All livestock, game and goods are sold "voetstoots" and the purchasers do not enjoy the protection of Section 55 and 56 of the Consumer Protection Act.

14. Any information provided regarding the quality, breeding, age, date of insemination, condition, reproductive status or any information regarding health, production or mass or any other aspect of the livestock and/or game, is provided by the seller and any misrepresentation by the seller is without the cooperation or knowledge of the Auctioneer. Any right of recourse as a result of such misrepresentation shall be against the seller.

15. Any bid made does not include VAT which, where applicable, will be added to the bidding price for which a VAT invoice will be issued.

16. All sales are for cash and purchase price is payable immediately to the Auctioneer on acceptance of the bid unless otherwise arranged prior to the auction with the Auctioneer. Any payment made in cash is further subject to cash or any other handling fees. Should the Purchaser however fail to make payment within 7 days from date of delivery, BKB will be entitled to add interest calculated at the current bank prime rate plus 5% to the capital amount outstanding. The interest will be calculated monthly and capitalised.

17. Should the purchaser not pay the purchase price immediately and has failed to make arrangements for payment with the Auctioneer, then the Auctioneer can/will cancel the sale and treat the assets or lots as unsold lots which may again be presented on the auction for sale or be sold out of hand by means of liaison services, depending on the seller's mandate to the auctioneer.

18. Ownership in the lot or assets will remain that of the seller until the purchase price has been paid in full to the seller with the provision that the risk in the assets or lot passes to the purchaser at the fall of the hammer as set out in clause 23.

19. In the event that Purchaser has made necessary finance arrangements with BKB, the Purchaser hereby authorises BKB to pay the purchase price or costs of transport, insurance and any other agreed cost, minus BKB's commissions, on behalf of the Purchaser to the Seller and other service providers, in which event the said payment by BKB on behalf of the Purchaser will be deemed to be monies lent and advanced, the terms and conditions thereof being agreed with the Purchaser in a separate credit agreement or sale agreement. All payments made by BKB to the Seller on behalf of the Purchaser in terms of this clause will be made after the lapse of 5 (Five) working days from date of delivery of the asset to the Purchaser. Any payment made by BKB to the Seller prior to the lapse of the 5 (Five) working day period is made at the sole discretion of BKB and not an enforceable indulgence.

20. For as long as any amount is owing to BKB by the Purchaser, the Purchaser may not, where the assets are the subject of security of the Purchaser's credit facility with BKB, relinquish possession of the said asset, nor may he cede the asset or any of its rights and obligations in terms of this agreement to a third party or otherwise encumber, sell or dispossess the said asset or allow it to become the subject of any right of retention, hypothec, pledge or any encumbrance, whatever the cause thereof may be. BKB may be entitled to cede its rights and obligations without affecting its rights of recourse for any monies still due to it.

21. In the event of the Seller already being indebted to BKB or any of its affiliates at the time of this auction, the Seller hereby irrevocably authorises BKB to set off the purchase price due to the Seller by BKB (minus BKB's commission) against the amounts due by the Seller to BKB.

22. Where BKB, in terms of a credit agreement, lent and advanced monies to the Purchaser for payment of the purchase price of any asset or payment of any transport costs or insurance premiums, no defence of whatsoever nature which the Purchaser may raise against the Seller or the transport contractor or the insurance company may be raised against BKB and the Purchaser shall still be obligated to pay all amounts owing, together with further interest and costs thereon raised in terms of the credit agreement or sale agreement, to be BKB. The conditions of this clause do not interfere with the rights, entitlements or remedies the Purchaser may have against the Seller, transport contractor or insurance company.

23. Neither the Purchaser, nor the Seller, shall be

entitled to apply set-off or to retain any monies owing arising from any claim they may have against each other or BKB with regards to any amount owing in terms hereof.

24. Each lot shall immediately after the fall of the hammer deemed to be delivered to the purchaser at which time the risk will pass to the purchaser who will at his own risk and cost remove the lots or assets from the auction terrain. Removal of any assets or lots however will not be allowed by the Auctioneer until payment of the purchase price by the purchaser or acceptable arrangements for payment thereof have been made by the purchaser with the Auctioneer.

25. The Auctioneer will only be obliged to give reasons of the auction if such reasons are other than the voluntary sale of goods by its owners.

26. The bidders' roll and vendor roll will be available for registered buyers for inspection with written notice and good reason during the normal office hours at the business premises of the Auctioneer.

27. The rules of auction will only be read out at the auction if they were not available to the public at the place of business of the Auctioneer. In the event of livestock and game auctions, the rules of auction remain unchanged and are in general available at the business premises of the Auctioneer or on the website of the Auctioneer.

28. Under no circumstances will BKB be held liable for any loss or damage of any cause whatsoever albeit direct or indirect damages suffered by anyone if the livestock and/or game at the auction premises have to be placed under quarantine as a result of the presence of a livestock and/or game disease present. In such event BKB will have the right to cancel the auction as well as any already complete sales and no party will be entitled or have a right of recourse against BKB.

29. Any party requiring permits, removal certificate, documentation of identification or any other statutory prescribed document will solely be responsible for obtaining same. Any instructions to an auctioneer with regards to the loading, transporting, choice of transport contractors, insurance or choice of insurers will be executed at the sole risk of the person acquiring such services and the Auctioneer will not be held responsible for any losses whether direct or indirect which may be suffered as a result of giving effect to the instructions by the Auctioneer. The Auctioneer however does accept responsibility as contemplated in Section 35(2) of the Consumer Protection Act whilst the goods or lots are under control of the auctioneer. Any agreement entered into by the Auctioneer with a transport company or insurer is done so in its representative capacity of the seller or buyer. All transport costs or insurance premiums are therefore payable to the Auctioneer in cash except if acceptable alternative arrangements were made with the Auctioneer.

30. Both the seller and the buyer consent to the jurisdiction of the Magistrate's Court as contemplated in Section 45 of Act 32 of 1944 having regard to any action which the Auctioneer may institute against the buyer or seller irrespective of the cause of action. Notwithstanding the aforesaid the Auctioneer will have the sole and absolute discretion to institute action in any High Court with appropriate jurisdiction.

31. Any legal costs that BKB may have or will incur as a result of the non-compliance of the Purchaser and/or Seller in terms of its or their obligations herein, shall be recoverable by BKB, together with collection commissions from the Purchaser and/or Seller on a scale as between attorney and own client.

32. No variation, amendment, novation or addition to these terms and conditions will have the effect of BKB renouncing any of its rights in terms hereof, unless it is reduced to writing and signed by BKB.

33. No relaxation or indulgence by the Auctioneer must be interpreted as a waiver of any of the Auctioneer's rights in terms hereof. Such relaxation or indulgence must also not be interpreted as a novation hereof.

34. Should any condition be unlawful or become retrospectively unlawful, that unlawful condition shall be deemed to be amended to the extent and in the manner as is necessary to make it lawful or should such amendment be impossible, the unlawful conditions shall be deemed divisible from the remainder of the conditions and pro non scripto.

WOODVIEW WAGYU™

BOUTIQUE BEEF

As the first and oldest Wagyu beef producer in Africa, we are passionate about this breed and have many years of experience when it comes to breeding superior genetics and excellent Wagyu blood lines. We take extra special care rearing our Wagyu cattle in a pristine environment with abundant clean air where they are fed only natural ingredients – the Japanese way. Thanks to this special care our cattle produce mouth-watering, award-winning beef.

Brian Angus
BRIAN ANGUS

OUR ROOTS

Farmer Brian Angus from Woodview farm in the Free State province of South Africa was on an Angus conference in the US in the '90s when he heard about Wagyu for the first time. His fascination with this unique Japanese beef cattle breed was born, and he wasted no time in starting to explore the opportunities it offered. At this point no other farmer

in Africa had any Wagyu genetics and Brian decided to import. Being the first Wagyu breeder in South Africa came with its own challenges, trials and errors. Today, Brian, known in South Africa as the Wagyu godfather – is the leading Wagyu breeder of superior genetics, selected and bred into the Woodview herd.

JOINING FORCES

In 2016 the Angus family from Woodview joined forces with the Van Reenen family from Sparta Beef – world-class beef producers with a proud heritage of more than 50 years. Thanks to this collaboration the Woodview Wagyu brand now not only benefits

from Brian's superior breeding skills, but also from Sparta's expertise in feeding cattle to their optimum potential, resulting in the unique gastronomic experience of premium quality Wagyu beef.

OUR BEEF CLASSES

Our beef is graded in BLUE, GOLD and SILVER class based on the marbling score achieved, and only the best will do when it comes to Woodview Wagyu.

Our **BLUE label** product signifies our top-of-the-range Woodview Wagyu. The meat has a marbling score* of no less than 8 on the lower range and up to 9+ on the upper scale. This means it has high amounts of fine web-like seams of intramuscular fat, so much so that the meat actually appears quite white. Treat yourself – this beef is in a class of its own!

**AUS meat marbling chart*

Our **GOLD label** product has a marbling score* of 6 to 7. This product has a fairly high amount of fine intramuscular fat, translating into that melt-in-the-mouth buttery Wagyu texture. Well worth it!

Our **SILVER label** product has a marbling score* of 3 to 5. This product has a fair amount of intramuscular fat and is the perfect introduction for someone trying Wagyu beef for the first time, gently easing them into the marbling scene. We very seldom have Woodview cattle in this class as most of our Wagyu has a marbling score of 7 and above.

QUALITY ASSURANCE

The Sparta cattle feeding operation, where the Woodview Wagyu cattle are hosted, is ISO 22000 accredited. A world-class electronic identification system (EID) is at the core of the ISO accreditation as it places much emphasis on the traceability of every animal, recording every detail from origin throughout the life cycle of the animal. The system starts at calf intake and continues throughout our vertically integrated operation up to packaged and deboned product.

All Woodview Wagyu cattle are slaughtered and processed at Sparta's FSSC 22000 accredited and Halaal certified beef plant, which is accredited for export (Export Plant Number ZA 91).

WAGYU COW-CALF PRODUCER AGREEMENT

We supply our bulls or semen to farmers on a buy-back agreement. We also purchase Wagyu calves and Wagyu slaughter-ready cattle sired by a registered purebred or full-blooded Wagyu bull. Genetic conditions are strictly adhered to. Please contact Brian about our cow-calf producer buy-back agreement.
